In Progress on April 3, 2021

Edit Assignments - Front End

- The overall structure for this user story has been set up. There is a bug with updating the assignment at the moment

Submissions - API

- The submissions API is close to completion, testing is left to ensure that it is ready for a pull request

SPIKE: PoC for running code from lambdas & SPIKE: PoC for running tests

- Able to create customizable execution environment using an AWS lambda
- Able to read .zip from S3 and read the contents of the file
- Able to execute code from the .zip
- Need more work to read execution output and integrate it with submissions

'Could not load course' error when trying to edit an assignment

- Investigation of cause is underway
